Toyyib Oladejo — Front-end developer

oladejotoyyibolalekan@gmail.com ❖ Github.com/olatoy2000

❖ https://olatoywebstudio.vercel.app/

SKILLS

HTML, CSS, TailwindCSS, JavaScript, TypeScript, ReactJS, NextJS, NodeJS, BitBucket, GitHub, SCSS, Cypress.

WORK EXPERIENCE

AFEX Commodity Exchange   **Jan. 2023 – May,2023**
Graduate Intern, Front-end Developer   *Ibadan, NG (On-site)*

AFEX develops and deployed a viable commodities exchange and supply chain infrastructure to support the securitization of agricultural products.

- Collaborated with designers and back-end developers to build the company's Xpert data portal and integration of APIs.
- Collaborated with a team of engineers to build the company's smart card.

AFEX Commodity Exchange   **May. 2022 – Dec. 2022**
Front-End Development Trainee   *Ibadan, NG (Onsite)*

AFEX develops and deployed a viable commodities exchange and supply chain infrastructure to support the securitization of agricultural products.

During the training period, the following topics were being taught;

- Building the basic structure of web page with HTML, CSS (including the popular CSS framework known as Tailwind CSS) and JavaScript.
- Techniques to create responsive web pages that adapt and respond to different screen sizes and devices, using media queries, flexible layouts, grid and responsive images.
- Collaborated JavaScript library called ReactJs and the React Framework called Nextjs.
- Version Control System.

PROJECTS

Advice Generator App: https://olatoyadvicegenerator.netlify.app/
 A This project is a coding challenge from Front-end Mentor. It requires to build an advice generator app with an API integration. I built it with Reactjs, Nextjs, Tailwind, CSS-glow-generator and React query .

WeatherApp: https://olatoy-weatherapp.netlify.app
A system which allows users to choose location of their choice and check the weather situation of the chosen area around the world. Built using HTML, CSS and JavaScript and weather API from openweathermap(online service, that provides global weather data via API).

Food Recipe: https://olatoy-foodrecipe.netlify.app/
A This is a food recipe app where the user can search meals and save meals for later. Built using React query and APIs from TheMealDB(an open, crowd-sourced database of Recipes from around the world).
